Installation Harbor

[Harbor docs | Harbor Installation and Configuration \(goharbor.io\)](#)

Suivi des étapes précédentes ci-dessous

Installation Process

The standard Harbor installation process involves the following stages:

1. Make sure that your target host meets the [Harbor Installation Prerequisites](#).
2. [Download the Harbor Installer](#)
3. [Configure HTTPS Access to Harbor](#)
4. [Configure the Harbor YML File](#)
5. [Configure Enabling Internal TLS](#)
6. [Run the Installer Script](#)

If installation fails, see [Troubleshooting Harbor Installation](#).
